Ability/Willingness to Try New Things		
Communication		
Building Ability		
Programming Ability		
Creative Ideas		
Other		
Team Weaknesses?		
Team Strengths?		
Team Meshed?		

Additional Notes:

Sample Teamwork Evaluation Form

Item	Evaluation (-, ✓, ✓ +, + or ++)	Notes and Comments
Members Found Individual Jobs	✓ +	All seemed comfortable in the positions/roles they chose.
Brainstorming Ability	✓ +	Still needs work Not all contribute. Tim is impatient and wants it his way – needs to work on listening to others
Able to Share Ideas	✓	Tia holds back then complains. All able to express ideas well.
Ability/Willingness to Try New Things		Hard to tell now – need more evaluation
Communication	GOOD!	Everyone was able to tell the others what they were doing. Builders talked to programmers and designers every step of the way!
Building Ability	-	Tried new things to make it strong, but still focus on wrong problem.
Programming Ability	✓ ✓ +	OK – but still too few team members are comfortable with the program.
Creative Ideas	++	Great ideas, but many are impractical. Need to narrow down ideas.
Other	✓	Boys became builders/ girls programmers. May have to help them shuffle jobs more or try all girls and all boys on a team.
Team Weaknesses?		Boy/girl division, not enough can program, Tim wants to lead but not everyone wants to follow.
Team Strengths?		Each knows their job well and are comfortable in it. Communication between jobs. Even-tempered and mostly tolerant of each other. Able to talk about new ideas.
Team Meshed?	YES, but girl/boy division
